ETISOFT STATEMENT

Because of the presence of coronavirus cases in Europe, following China and its appearance in Poland, the Board of Etisoft Sp. z o.o. has taken a number of steps to ensure continuity of production and safety of employees. With this in mind, we scrupulously follow international, national and local recommendations on prevention and hygiene in order to prevent as much as possible the consequences resulting from the spread of the virus.

We began to analyse the situation as soon as the first information about the possibility of restrictions caused by the virus appeared.

To counteract possible bottlenecks, we carefully monitor the supply of raw materials and equipment. If necessary, we activate alternative sources in the supply chain. To maintain the quality of our services, we implement the necessary procedures wherever necessary and possible.

We are in constant contact with our customers, suppliers and business partners.

The health and well-being of our employees and visitors has the highest priority for us. Therefore, we have implemented a number of procedures to minimise the risk of infection. In the form of announcements, posters and pictograms we remind you of the basic principles of hygiene (washing hands, avoiding shaking hands, using disposable wipes and towels). Wherever possible, we have introduced remote working practices, shortened the time between shifts in order to minimise the number of workers in one place. Cleaning services are equipped with detergents for disinfecting common rooms. These are just some of the security precautions we have taken.

We limit visits, meetings, both internal and external, we cancel all trainings. Each trip of our employee to customers in Poland must be preceded by the approval of the Board. These visits can only take place if a positive risk assessment carried out by Etisoft has been made before the visit date. We also recommend that our clients carry out such a risk assessment. We have prohibited business trips to particularly high-risk countries. In the case of private trips to such areas, employees are required to arrange work schedules for the next two weeks over the phone.

We encourage you to contact us by e-mail, telephone, skype or help desk (service support).

We assure our customers to constantly monitor the situation and implement preventive measures. We will keep you informed about any changes.

Yours sincerely
ETISOFT Sp. z o.o.
Michał Majnusz
